

Mascot was founded in 1938 in Norway and is today a leading manufacturer of power supplies and battery chargers. Our main offices are located in Fredrikstad, Norway.

Production takes place in our own facilities in Tallinn, Estonia or Ningbo in China, to better serve our customers' needs for quality products at competitive prices and lead times. At Mascot Ningbo, we also manufacture many of the components for our own products and for other companies as well. Mascot has been certified according to ISO 9001 since 1993.

What we offer our customers

- More than 80 years' experience in R&D and production
- Well-known international standard of power electronics
- ISO certified manufacturing facilities
- Quick request response program for providing samples

Approvals and Certificates
